(Link for Web Portfolio)

I am a committed BSIT student with a solid background in Java, Python, and C#. as well as practical experience developing websites with HTML, CSS, and JavaScript. I am eager to contribute technical expertise and creativity to an innovative IT team, with my track records includes a successfully designing projects like a Netflix Clone Web and a Voting System Application. Seeking a challenging role to leverage academic knowledge and real-world experience for impactful contributions in the evolving technology landscape.
